PISCES

March and April will present the chance to overhaul your personal life, making this an excellent time for romance for couples; and for singles to commit. Another important area to focus on will be health. If the supermoon on March 21 brings your vulnerabilities out, rest assured you will get the chance in April to boost your self-confidence, health, relationships and collaborations.

THE SCOPE - MARCH/APRIL

ARIES

The third in a series of three supermoons will be on March 21 so events in March may feel intense. Be ready to work through old issues and to come up with empowering decisions. Be bold. This supermoon will spotlight work and personal choice and will be an ideal opportunity to boost your health. By the end of April, you should be in a stronger position both at work and health-wise.

TAURUS

The big news in March is the re-entry of Uranus into Taurus, and this will help you to put in gear ideas that you considered in 2018. You'll feel more prepared to take action, even if Uranus brings potentially long-ranging change that may seem disruptive. Grab life by the horns and be ready to initiate changes featuring travel or study; and embrace new developments in your personal life.

GEMINI

Be prepared to assume the role of teacher and leader over the next two months. You may need to stretch yourself, but you must take the opportunity to step into a more responsible role. The supermoon on March 21 and the Full Moon on April 19 will spotlight key talks or negotiations. Be ready for travel and the chance to re-arrange domestic, creative and family matters.

CANCER

This is potentially a life-changing year. The New Moon on March 7 will bring clarity to a shared circumstance so, where relationships may present challenges, or seem unclear, you should achieve insight that will pave the way to a better understanding. Be prepared to consider life on new terms and be discerning about which activities are life-enhancing and which are simply distracting.

LEO

March and April are optimum months for love, so ensure you plan a holiday or a romantic event. If you have found relationships or collaborations difficult, the next two months will be excellent for sorting out differences and finding common ground. The way you share resources, such as finances and space may come under the spotlight, and may require a careful change of routine.

VIRGO

Considerable developments in your personal life are likely over the

coming months. For some Virgos, this will apply to changes in your partner's circumstances; for others, this will apply to your family. Take the opportunity at work to embrace a more creative phase.

LIBRA

The better organised you are, the more you will instigate innovative changes with family, at home and within your world at large. Be ready to take action to improve work and health, too. Developments in March will be particularly empowering. And in April, get set to turn a corner in a key domestic circumstance that could also spell changes in a business or personal partnership.

SCORPIO

Your daily routine, work and health will be the focus for the greatest change in March. Change may be the result of your endeavours and ideas in 2018. The motivation to make changes is the expression of your desire to be more creative and nurturing. Your love life, family and personal circumstances will develop in line with developments at work or regarding health.

SAGITTARIUS

Your home life will be a focus early in March as you'll enjoy considering ways to make it a true haven. Be practical and avoid making assumptions. Your social life is due for an overhaul end of March, so look for ways to strengthen ties and to meet new people. Early April your imagination will know no bounds, so ensure your decisions are realistic as well as inspiring then.

CAPRICORN

The Supermoon on March 21 will shine a light on the activities that provide you with a sense of purpose and achievement. Keep an eye out for opportunities to promote happiness at work and in your daily life throughout March. A personal or financial matter will be the main focus as you strive to create more meaning in either or both areas. Do your research as change is on the way.

AQUARIUS

You will be pleased to know there will be the opportunity to boost your finances and self-esteem in March, so take the initiative. A positive outcome will depend on good planning and clever collaboration. In April, the focus will shift to the importance of balanced, healthy relationships.
